How Police ENFORCE Crime For State Revenue/Control & Are a Severe...

The original article's author Keith 'Randall from Recess' Edwards leads with "[\*Man from China charged with assaulting officers unleashes courtroom outburst after psych evaluation ordered\*](#)" clearly intended for those who consume headlines as articles. Misrepresentation, pro-State, pro-police, and anyone that [\*resists abusive authority is crazy\*](#). They didn't know I recorded the hearing. That's how it is, though. Governments that can't defend doing foul things often engage in media libel & smear campaigns where the 'journalists' are never responsible for what they write because they got it from someone else(the State). Centralmaine.com is a State mouthpiece. What police want you to think, they stain the pages with it. If you get your information from a corporation that gets their information from the State, you are consuming State propaganda. Had I done what Randall from Recess presented, I would have been removed.

I did not assault nationalist, militant, system enforcers. I resisted being kidnapped for ransom(bail), revenue(debt imposition post conviction), extortion of others' wages for arbitrary infractions, systemic violence by police, the socioeconomic oppression(war on the poor) for their wealthy, leash-holding parchment scribblers, and their own scribbles saying we can film their system enforcers. Unleashed is a stupid word to use here. Unleashed hints at animal. Apparently, he's never seen the Jet Li movie or when [I have actually had to unleash](#). My *frustration* is with these supposedly intelligent masters not comprehending what I am saying. If an agency is shown to have forged papers against someone, you don't send the vulnerable person BACK to those same people. I can handle a mental health evaluation. As you can hear clearly in the hearing, my issue is with Maine State Forensics. Here is the hearing, it is only 8 minutes:

original sound - Brent Elisens

**“Brent Elisens, who faces charges of assaulting three state troopers in a 2021 roadside incident, was ordered to undergo a mental health evaluation after he asked to represent himself in court”**

I did not ask to represent myself. My attorney presented me with the option of him being *standby counsel* in order to be able present how they would not allow him to allow me to present:

**“The Sept. 22, 2021, incident escalated when Trooper Shawn Porter sought to place Elisens under arrest for obstructing government administration. Elisens kicked Porter in the chest and hands, drove a short distance with Porter in his car window, bit another trooper, and kicked a third, before being secured in a police cruiser and taken to jail, according to an affidavit filed by Porter.”**

I didn't do what this says and it conveniently omits police instigation and other behaviors such as Porter's [Commerical Vehicle Extortion](#) of my future employer's wages. Boots and I had a physical altercation but they are making it look like it happened differently than it did.

**“Murphy granted those motions but also ordered Elisens to undergo a mental health evaluation by the State Forensic Service to determine if he is mentally competent to both proceed to trial and able to represent himself in court. Elisens loudly objected and lashed out at court officials in response, saying: “You guys just live in luxury at our expense.” Later, as he angrily left the courtroom, he said: “This system is trash. All of you are (expletive) trash.”**

The order of events is incorrect. He put what I said at the beginning of the hearing at the end making it look like something happened that didn't. This journalist is why no one trusts the media. Anger is criminalized in this society when angry people often have valid grievance. Complacency is more of a social threat. See: [Adolf Eichmann/Banality of Evil](#).

"In December of 2022, Elisens filed a civil rights lawsuit against the State Forensic Service, officials there including Ann LeBlanc, a forensic psychologist and contract examiner for the State Forensic Service, and his then-lawyer, Jennifer Cohen. He claimed they had defamed him and made up stories about him, following the evaluation of him that was not completed. His federal court filing states this was part of an effort to make him appear delusional and schizophrenic so they could have him committed to a mental institution as a political prisoner."

I did NOT claim they defamed me. I claimed they put lies in legal paperwork [and I have it recorded](#). That civil rights motion is the only way robed tyrants permit you to file against state officials and an attorney as well. I said "most likely" have me committed. A person in a mental health facility gets held indefinitely if the [non-STEM field "doctors" deem it so](#). It's a conviction without being able to defend yourself.

"U.S. Chief District Judge Jon Levy dismissed that lawsuit in March, over the objection of Elisens, who later filed a motion, which was also denied, titled "Motion to Remove Licensed/Badged /Robed Tyrants and Prevent them from Obtaining Positions of Authority Elsewhere.""

I titled [the motion this](#) because it shows the fallacy of begging abusive authority to save you from abusive authority. Licensed(Ann LeBlanc), Badged (Taylor Reynolds), Robed (Nivison & Levy). make sure you read motions not just their summary decision or a mindless media suit's perception of that summary.

"Speaking before judge Murphy, Elisens said abusive psychiatry is a severe problem and psychology is not a real science."

I said "abuse of psychiatry" and it's not a "valid" science. It isn't. It is not a STEM field:

### Why is psychology not considered STEM?

Psychology is often considered a soft science compared to hard sciences like mathematics and physics. That's because [psychology's main focus, the human mind, is highly complex and hard to observe](#). While you can physically define an equation or chemical compound, mental states and processes have no physical substance.

He then goes on to share news articles other people wrote about Varnell. [Here's the Varnell situation](#) and in great detail with video and audio. Had I done what Edwards presented in court, I would have been removed. I asked him, "You know I have it recorded, right?" His response was that I wasn't supposed to do that. That tells you lots about his integrity:

The editor Scott Monroe is neighbors with the [hillbillies](#) in my [neighborhood](#) that have been making up [stories](#) to police.

Pushing police reports without asking questions is not reporting. That makes you a bulletin board for the OVRA/NKVD reruns. Edwards didn't even remember who I was. Please remove the blue stripe phallus from your pasty, doctrine bound anoose. Corporate citizens care for property not human rights, so liability/revenue is the bottom line. Integrity is gone and you push police material so you are never liable. You confirm your bulletin board status but counterintuitively, you send people my way to find out that I am not who you presented me as. Feel free to listen to my LinkedIn talk shown in the screenshot, statist degenerate. If you read someone's story about me but not mine in my defense, you are trash...but we know that already. You write and speak what boots and other corporate POLICies dictate you do. Proudly, it seems.

Take some time to introspect and ask yourself why you think your behavior is acceptable. Can you come up with anything other than "Massa said!" or other authoritarian doctrines?

The law: "Do whatever you want to whoever you want as long as it is within the scribbling of wealthy, negative labor doing politicians no matter how socially or environmentally destructive." Yeah that sounds like a healthy existence for people.

Strange that your bald eagle phallus polishing cheeks are so silent about me beating that aryan boot worshiper with my Kali sticks after he got violent in traffic:  
<https://distherapy.altervista.org/waterville-me-white-supremacist-beaten-with-kali-sticks/>

Your daily routines and behaviors create the people you claim police are heroes for 'protecting' society from...when they don't protect anything. They come in after and clean up for State control/revenue and DA career points. Justice is a lucrative misnomer for State sanctioned vengeance. The law is attorney mandate and attorney mandate is about wealth and control, not human rights or quality of life for all. Only cowards and sadists support police. Which are you?

Your luxurious, excess living at the expense of so many, while you write garbage about them to their peers is ....well...study the history of governments that utilized the media to subjugate, dominate, and oppress their cheap labor. The State and its press ALWAYS lose. Stalin's regime and Hitler's regime all thought they would win the world and they got fucking wrecked. Look what happened to William Joyce. Your position is only semi-stable as long as the dehumanizing, environment destroying system you push remains. This cannot be the case as it eats up everything in its path in order to continue steamrolling. Today's words are "SOCIAL", "ENVIRONMENTALLY", and "UNSUSTAINABLE". You flag wavers may be doing the socially acceptable atrocious thing now so YOU can live well, but you are destroying any

atrocious thing now so YOU can live well, but you are destroying any quality future for our children.

Remember the nazis called Jewish people criminals? Remember the 1770's abusive authority called american revolutionaries criminals and perverts?

Here's the corrected version of your trash ass writing:  
<https://distherapy.altervista.org/writer-security-social-researcher-challenges-court-on-their-exploitation-dehumanization-and-abuse-of-psychiatry/>

You mindless fucking chud. A remedial, flag worshiping, OVRA/NKVD propaganda editor. Just consider the possibility that someone you dehumanize, a product of your daily behaviors, may be more intelligent than you and have more social/existential awareness than you. Easier to just repeat what boots said, huh?

Take your precious skycloth of Native American genocide and sell it for a shot of coffee, if it's even worth that. Patriotism is the virtue of the xenophobes.
